

# COSMOS

---

Congratulations on the purchase of your new Cosmos satellite dish. This manual describes the installation of the 8.5', 10.5', and 12' models. The Cosmos satellite dish is designed for reception of microwave signals from all C and Ku-band communication satellites. To provide the best operation, the dish and mount must be assembled and aligned correctly. Please read this manual and all other instructions

carefully before installation. Be sure to fill out the enclosed warranty card.

This manual describes the installation of the dish and mount when equipped with a linear actuator.

We know that satellite television will bring you many years of enjoyment. Thank you for choosing Cosmos.

**WARNING: DANGER OF ELECTROCUTION**

**INSTALLATION OF THIS PRODUCT NEAR ELECTRICAL POWER LINES IS DANGEROUS.**

Do not install near overhead wires. Do not allow any part of the dish, mount or stand to contact electrical wires.
