

Philips Pronto™ Remote Control TSU9600 Fact Sheet

Philips, a world leader in remote controls, is again redefining multi-room control with its latest and most impressive entry, the Pronto TSU9600 remote, an advanced, multi-functional device that provides unrivaled customization, design and control. Based on extensive research with installers, the TSU9600 is designed with customers' advancing home technology in mind. It provides the necessary storage (65MB¹) and upgradeable characteristics to become an essential part of today and tomorrow's digital lifestyle. Together with the wireless extender (RFX9400) or serial extender (RFX9600), the TSU9600 can command an entire household of digital devices – ideal for today's connected consumer.

Blank canvas to be customized by installers

- Dedicated media server and lighting control with out-of-the-box Escient® FireBall™ and Lutron RadioRA lighting control.
- Ultra-reliable with best-in-class Wi-Fi® wireless link for complete home control.
- Includes ProntoEdit™ Professional software for customization and access to one of the largest databases of up-to-date equipment codes.

Unparalleled design

- Includes a compact profile and flush-mounted, 3.7" VGA touch screen for the clearest and sharpest user interface. Features dynamic resolution and a wide (160 degree) viewing angle.
- Access to one of the largest IR databases, which is updated quarterly. With MyDatabase, installers also make more efficient use of configurations already programmed, cutting down on repetitive work.
- Easy-to-use macro channel wizard.
- Ultramodern flat display design and optimized button layout.
- High-gloss, black front panel, blue-backlit buttons and a docking station that emits a comforting white glow.
- Ergonomic grip with soft touch feeling; rotary wheel for easy content navigation.
- Discreet, built-in stylus holder.
