

BD-P1000

BD-P1000 Blu-ray Disc Player – Enjoy the HIGHEST DEFINITION.

Samsung presents the highest-definition playback in the world: the BD-P1000 Blu-ray Disc Player. Be among the first to view Blu-ray format discs on your HDTV. You'll marvel at the clarity and full-color spectrum of every scene, while multi-channel sound puts you in the center of the action.

Samsung technology also offers backward compatibility, letting you enjoy your favorite CDs and DVDs. The BD-P1000 even takes your current DVD library and upconverts it to a near hi-def experience via 720p/1080i and 1080p. The user-friendly graphic interface includes a full-color, hi-def animated menu, with features such as advanced subtitle functions, video scene search and informative pop-ups. Two HDMI™ ports connect your HDTV Home Theater System and other digital devices. And Samsung's unique 10-in-2 multi-memory card slot displays 2 mega-pixel and larger images in full Hi-Def resolution.

BD-P1000 Blu-ray Disc Player – Enjoy the HIGHEST DEFINITION

More capacity, more versatility!

Current dual layer Blu-ray discs can hold up to 50GB. That's over 4 hours of HDTV programs, or up to 26 hours of standard definition TV. And thanks to the structure of Blu-ray discs, capacity is likely to increase two-fold in the future.

Complete Backwards Playback compatibility

In addition to playing high-definition BD discs, Samsung Blu-ray technology offers complete backward compatibility. You can still enjoy your current favorite CDs and DVDs, no matter the format. In fact, they look and sound better than ever before, because the BD-P1000 can take your current DVD library and upconvert it to a near high-definition experience via 720p/1080i and 1080p.
