

Product Information

Commercial Dish - Heated

The Commercial Dish is a flexible design that is configurable for either Western Arc or Eastern Arc by adding and moving LNB's. It eliminates the need for multiple dishes. It may also be used with a single FSS LNB for 118.7 or 121 orbital locations as a second dish.

Features

- Factory installed heater with thermostat and weather cover
- includes one LNB heater with the Reflector
- Additional LNB heaters available
- 25 ft electrical cord included
