

Introducing Genie™ from DIRECTV.

An HD DVR so advanced, your every TV wish is granted.

Genie™, only from DIRECTV, is one HD DVR receiver that serves your entire home. So now you can enjoy a full HD DVR experience on every TV in your home, without seeing a box in each and every room.

Genie™ also avoids recording conflicts by letting you record any 5 shows you want, all at the same time, all in HD. Genie™ even recommends new shows you might like, based on what you already watch.

And, with up to 3 times more HD recording capacity than cable, there's more than enough room, so you won't have to delete your favorite pre-recorded shows again.

Based on one Genie HD DVR setup (model HR34 Advanced Whole-Home DVR only). Requires a C31 Client or an RVU-enabled TV/device for each additional room. Additional fees apply. Access to programming based on package selection. Blackout restrictions apply to sports programming. Program must air in HD to record in HD.

GENIE™ SERVES YOUR ENTIRE HOME WITH ONE HD DVR — With Genie™, enjoy a full HD DVR experience on every TV in your home. Now you can record, pause, fast-forward, rewind and delete pre-recorded shows from any room. You can even start watching in one room and finish in any other. Plus, your family can watch the same pre-recorded show simultaneously in up to 4 rooms.¹

GENIE™ ELIMINATES RECORDING CONFLICTS — Genie™ lets you record any 5 shows you want — all at the same time — all in HD — and all with one central HD DVR.²

GENIE™ STORES ALL YOUR FAVORITES — Genie™ has more than enough room, so you'll never have to delete your favorite shows to make room for new ones. Genie™ comes with a 1 terabyte HD DVR storage drive with up to 3 times more HD recording capacity than cable.³

GENIE™ ELIMINATES INCONVENIENT BOXES — Genie™ serves your entire home, so you can enjoy a full HD DVR experience on every TV in your home — without seeing boxes in every room.¹

GENIE™ IS SUPER SMART — Genie™ even recommends new shows you might like, based on the ones you typically watch. It's never been easier to discover new favorites.

¹ Requires C31 Client or an RVU-enabled TV/device for each additional room. Additional fees apply. ² Access to programming based on package selection. Blackout restrictions apply to sports programming. Program must air in HD to record in HD. ³ Based on one Genie HD DVR setup (model HR34 Advanced Whole-Home DVR only). Actual recording capacity varies based on type of programming being recorded. Program must air in HD to record in HD. Remote viewing requires a model C31 Client, H25 HD Receiver(s) or RVU-enabled TV/device in each additional room, a SWiM network and Advanced Receiver Service (\$20/mo.). Visit directv.com/genie for complete details. To access HD programming, HD television equipment also required. Number of HD channels varies by package. Limit three remote viewings per Genie HD DVR (model HR34 Advanced Whole-Home DVR) at a time. See additional disclaimers on page three. PRODUCED BY DIRECTV MARKETING COMMUNICATIONS DEPARTMENT. FOR SALES PERSONNEL USE ONLY. NOT FOR PUBLICATION OR CUSTOMER DISTRIBUTION.

When customers ask who has the **best HD DVR**, you've got answers.

DISH claims Hopper can record up to 6 shows at once — is that true?

- The Hopper only has 3 tuners, so outside of Primetime hours you can only record up to 3 shows at once. And even with their Primetime Anytime feature, they're forcing you to record the channels they want you to record. With Genie, you have the freedom and power to record any 5 shows you want at once, anytime you want, all in HD.

Is DISH's Hopper compatible with RVU-TVs and game consoles?

- No, only DIRECTV's Genie is RVU-enabled. That means that Genie works with your RVU-TVs and game consoles so you can enjoy total receiver-less TV.

MORE FREQUENTLY ASKED QUESTIONS

What are the Genie and Clients?

- The Genie is our best HD DVR ever! It is the entertainment hub of the home and shares content seamlessly with other connected devices, also known as Clients. These Clients can be the DIRECTV Clients or other devices such as RVU-enabled TVs, gaming consoles and Blu-ray players.

What is RVU and how does it work?

- RVU is a software technology that is built into the Genie, enabling it to act as a server for the smaller Clients. RVU allows the Clients to access all live and recorded content from the Genie, as well as User Interface (UI) features and broadband-based services.

What do the Clients do?

- By definition, Clients do not contain tuners of their own. They connect to the Genie in order to access its programming, recorded content and other DVR functionality. You'll need one Client for each additional TV unless it is RVU enabled.

Can I use a Client by itself?

- Because the Clients do not have tuners, they cannot receive DIRECTV programming or respond to DVR commands without being connected to the Genie.

How many TVs does the Genie provide with DIRECTV service?

- The Genie can be connected to up to 8 separate rooms, providing full DVR functionality and DIRECTV programming for each connected TV.

How many shows can I record and watch at once?

- Each Genie has five tuners so you can record up to 5 programs of your choice at a time. If you are recording a show on the Genie, you can watch it at the same time in up to three other rooms. You can also play the show later in multiple rooms simultaneously.

MORE FREQUENTLY ASKED QUESTIONS

Can I pause, play and rewind live TV with the Clients?

- Yes, you can pause, play and rewind live TV in any room with a Client.

Can all of the TVs connected to the Genie record shows?

- You can schedule a show to record on the Genie from any Client that is connected to it. DIRECTV Clients have full and independent DVR capabilities. You will not be able to record content from a connected HD Receiver.

Can I combine the Genie system with other DIRECTV HD DVRs and receivers?

- Yes, the Genie will work with any other DIRECTV HD DVRs and HD Receivers that are compatible with Whole-Home DVR service, so you can play, pause, rewind and delete recorded content on the Genie from any room of the house. Please note: You will not be able to record content to the Genie from a connected HD Receiver or HD DVR.

Can I get on demand programming with the Clients?

- Yes, you can access on demand programming with the Clients if the Genie is connected to the Internet.

Are DIRECTV Clients able to skip commercials automatically during pre-recorded content?

- Like any HD DVR, DIRECTV Clients can fast-forward through commercials on recorded shows but they do not skip them automatically.

How many hours of programming can the Genie hold?

- The Genie has a 1 Terabyte (1TB) hard drive and can hold up to 800 hours of SD programming or 200 hours of HD programming. (Actual recording capacity varies based on type of programming being recorded.)

Is Picture in Picture (PiP) available on the Genie and Clients?

- PiP is available on the Genie, however it is not available on the Clients.

Can I access DIRECTV TV Apps on the Genie and Clients?

- Yes, you can access DIRECTV TV Apps on the Genie including Pandora, ScoreGuide, Facebook, Twitter and other general apps such as news, sports and weather. These apps are integrated into the Hi-Def Guide and can be easily accessed via the menu. It is important to remember that some apps require an Internet connection.

Can I set parental controls on the Genie and Clients?

- Yes, you can set up the parental controls directly on the Genie and Clients for access restrictions on the entire system.

Do I need to be connected to the Internet for the Genie and Clients to work?

- You do not need an Internet connection, but it is recommended since a connected HD DVR offers the best entertainment experience and is required for many of the Genie and Client features to function.

Are Clients still assessed a monthly charge as an additional receiver?

- Yes, every TV except the primary TV will be assessed a \$6 monthly "Additional TV" fee.

What are the dimensions of the Genie?

- Height: 3.25 inches, Width: 15.75 inches, Depth: 11.85 inches.

What are the dimensions of the Client?

- Height: 1.024 inches, Width: 5.906 inches, Depth: 3.661 inches.

Can I hide the DIRECTV Client out of sight?

- Yes, the DIRECTV Client can easily be hidden behind the TV or in a cabinet when used with a Radio Frequency (RF)-capable remote control as they do not require a direct line of sight with the box.

Remote viewing requires a model C31, H25 HD Receiver(s) or RVU-capable TV/device in each additional room, a SWiM network and Advanced Receiver Service (\$20/mo.). There is a limit of three remote viewing per Genie at a time. Visit directv.com/hr34 for complete details. DIRECTV and the Cyclone Design logo are registered trademarks of DIRECTV, LLC.
