

# 4K Joey™

## UHD Satellite Thin Client

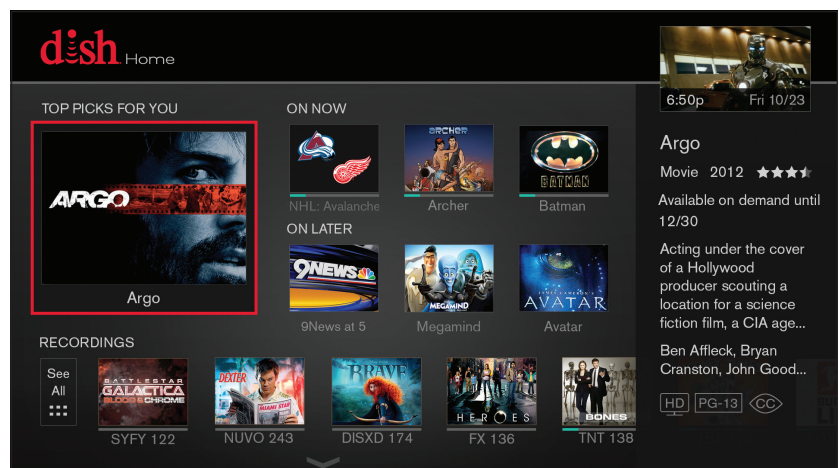

### THE THINNEST CLIENT RECEIVER OF ANY CABLE OR SATELLITE PROVIDER

The 4K Joey is a next-generation thin-client receiver that displays crystal-clear 4K video and includes Bluetooth® and Picture-in-Picture, making for a high-end whole-home experience.

### Features

- H.265/HEVC enhanced compression decoding to support 4Kp60 10-bit video format (excluding graphics), in addition to MPEG-4 and MPEG-2
- Ultra-slim design
- Uses MoCA 2.0 and 1.1 technology to connect to the Home Video Network for satellite programming and DVR services via a Hopper® or Hopper with Sling®
- Mounts on a wall or flat surface for space-saving convenience. Designed to fit behind wall-mounted 4KTVs, even in some of the most challenging scenarios
- Optional stand available for vertical positioning
- First cable or satellite client with Picture-in-Picture
- First Joey with native Bluetooth support
- Will be released with the new Sydney remote (see page 2), a next-generation remote featuring a new, innovative user interface
- Will also support the forthcoming Melbourne remote and existing 40.0 remote
- Enhanced search and UI functionality
- Software upgradeable via satellite

New Home Screen

Connecting the World

## Technical Specifications
