

AMC-21 125W Readings

I've made a few observations over the past couple of days. These are from a fixed **1m** dish with a GEOSAT*pro* SL2PLL that feeds a powered multiswitch. The quality numbers are from an Amiko NanoHD (ALi 3612 processor). The meter used is an older SH200.

11/16/19 13:30 Overcast 52°F

| TP | C/N | Quality |
|-----------|------------|----------------|
| 11917 V | 13.50 | 70 |
| 12180 V | 13.65 | 81 |

11/17/19 02:20 Clear 40°F

| | | |
|---------|---|----|
| 11917 V | - | 67 |
| 12180 V | - | 85 |

11/17/19 13:50 Clear 56°F

| | | |
|---------|---|----|
| 11917 V | - | 71 |
| 12180 V | - | 85 |

11/17/19 14:30 Clear 57°F

| | | |
|---------|-------|----|
| 11917 V | 14.10 | 71 |
| 12180 V | 14.10 | 83 |

11/18/19 17:35 Overcast 45°F

| | | |
|---------|---|----|
| 11917 V | - | 71 |
| 12180 V | - | 83 |
