

## URGENT NOTICE

July 30, 2004

# CBC WEST IS MOVING TO A NEW SATELLITE LOCATION

To accommodate some of the restructuring that must occur to allow for new services on Anik F1 and Anik F2, Cancom will be moving CBC West to a new satellite location. CBC West, which currently resides on Anik F1, Transponder #11, will be moved to Transponder #13. On August 3, 2004 Cancom will begin a dual feed of CBC West, at 12:00 PM (noon) Eastern Time.

On August 3, 2004, CBC West will be available in the new location at the following coordinates:

VCT ID	DBS VCN	CATV	MPEG#	UCS Group	Polarization	Transponder	L Band Frequency
517	308	247	8	1	Vertical	13	1330.75

**NOTE: The dual feed period will end October 4, 2004.  
At that time it will be available from  
Anik F1, Transponder #13 only**

HITS QT/Cable Plus:

Changes will appear on standard Hits/QT channel maps on September 23, 2004, at 1:00 PM ET. Cable operators that do not want the change to appear on their IPG must contact Motorola to have their channel map modified. At the same time, we will be adding CH Hamilton to the standard maps where it does not currently exist. Cable operators who have created Custom channel maps must contact Motorola for changes to their channel map.

For the most recent Anik F1 and Anik E2R channel and frequency charts, please visit our website at: [www.cancombroadcast.com](http://www.cancombroadcast.com)

COMING SOON:

- 1) Information on the transfer of services from Anik E2R to Anik F2
- 2) Information on the new services that will be launched on F2
