

Distribution Example 8

DISH Pro Plus Twin with Off-Air/ CATV, Super Home Node and Diplexers

- Off-air/CATV provided to all TV outlets.
- A 4-way splitter was replaced with a Super Home Node.
- Use 2150 MHz RG6 cable between the LNBF and the satellite inputs of the receiver.
- Use drip loops to direct water away from F-connectors.
- Ground in accordance with national and local electrical codes.
- Unused Super Home Node ports should be capped with 75 ohm terminators.
- Your installation may vary depending upon the losses in your system. Line amplification may be required. Ensure all components in the system operate within manufacturer specifications/ratings.

❶ Diplexers must be DISH Pro compliant.

❷ Represents possible Super Home Node Power Inserter locations.

❸ TV 2 programming can be viewed at the TV 1 location.
