

GEOSATpro DVR1100c / DSR200c

Technical Bulletin 2009.12.13

USB Port File Loading

Factory Firmware USB file extension naming:

DVR1100c - .GPB

DSR200c - .GNO

Channel List file extension naming:

DVR1100c / DSR200c - .SDB

Channel Editor - Channel Master compatible (import / export as CNX file type)

Steps to load a new factory Firmware or Channel List:

- Power On the receiver
- Insert the USB drive containing the uncompressed file
- Wait 10 seconds for the USB drive to be recognized
- Press Menu
- Press Left or Right Arrow to select the Utility Screen
- Press Up or Down Arrow to select USB
- Press OK to open the USB drive
- Press Up or Down Arrow to select the file to be loaded
- Press OK to load the file

* If a Firmware File is selected “Select Upgrade Mode” prompt will appear. Select Boot Loader Upgrade and Press OK. Receiver will automatically reboot

* If a Channel List File is selected, Press OK when an on screen prompt displays “Load user channel success Reboot after 3SEC....”
