Shipping: October 17, 2006

Price: MSRP \$499.99

Available at: Best Buy, Circuit City and other Home Theater Retailers

Product Description

Harmony 1000 is the latest and most intelligent evolution of simple, one-touch control. Say goodbye forever to the wasted time and endless frustration of multiple remotes controlling multiple devices. With Logitech's patented Smart State technology, one touch is all it takes to seamlessly control up to 15 separate components.

The Harmony 1000 remote's touch-sensitive screen makes the renowned Harmony activity control even easier by displaying the important controls when they are immediately relevant. And unlike some of today's high-end universal remotes, the Harmony 1000 remote controls any device with an infrared receiver – including VCRs, digital video recorders, high-definition televisions, and many household appliances. Meanwhile, its stunning brushed-chrome and piano-black finish make the Harmony 1000 remote an aesthetic complement to today's most sophisticated living rooms.

- Simple one-touch activity control
- 3.5" color touch screen LCD display
- World's largest A/V Control database
- Computer based set-up
- Rechargeable lithium-ion battery
- RF and IR communication

Key Features

- **One-Touch Activity Control**

Harmony 1000 tames even the most advanced and complex of entertainment systems. Logitech's Smart State Technology® and an innovative 3.5-inch touch screen make the Harmony 1000 both incredibly easy to use and elegant. Feel like watching a DVD? Simply touch the DVD icon and the Harmony remote will power on your TV, DVD player, and stereo receiver, set all the inputs - and even press play!

- **Vibrant 3.5 inch color Touch screen**

One-touch simplicity has made Harmony the world's best selling advanced remote. The Harmony 1000 continues to lead the evolution of the intelligent control with a 3.5-inch color touch screen and large, easy-to-read icons. With its engaging and logical interface, the Harmony 1000 simplifies even the most complex functions.

- **World's Largest A/V Control Database**

The Harmony 1000 remote delivers full control of up to 15 home entertainment devices. Logitech's on-line database consists of over 4,500 manufacturers and over 150,000 devices - everything from HDTVs to projectors, from DVRs to VCRs, lighting controls and more!

- **Computer Based Set-Up**

Connect the Harmony 1000 to your computer and the set-up wizard guides you through the entire set up process. Simply respond to a few basic questions about how you use your entertainment system and Smart State Technology does the rest.

- **Rechargeable Lithium-Ion Battery**

The rechargeable battery pack keeps the Harmony 1000 remote powered and always ready for use. The remote is elegantly designed to rest in the recharging cradle when not commanding a home entertainment system. The cleverly designed charging cradle ensures that the remote will be easy to find and ready to begin any activity.

- **Advanced Control without line of Sight**

The Harmony 1000 remote uses infrared as well as Z-wave wireless home automation technology to control entertainment devices without a direct line of sight. Hide wires and components behind cabinet doors or in a different room and command it all with one remote.

System Requirements

For set up, a Windows compatible or Apple computer is needed with an Internet connection and available USB port. All Harmony remotes are compatible with tens of thousands of makes and models of home theater components.

The minimum recommended Windows® system configuration is:

- Microsoft Windows 2000/XP/Vista operating system
- USB plug-and-play support
- CD-ROM drive
- Internet connection (dial-up, cable, DSL, LAN, etc.)

The minimum recommended Macintosh® system configuration is:

- Mac with USB plug-and-play support
- Mac OS X 10.2 or later operating system
- CD-ROM drive
- Internet connection (dial-up, cable, DSL, LAN, etc.)
