

## Quick Facts

# Single-Cable, Dual-Tuner Installations

For "single-cable,  
dual-tuner"  
installations,  
It Takes 3!

All three components  
must be DISH Pro Plus:

### It Takes 3!

- DISH Pro Plus Technology allows a DISH Pro Plus (dual-tuner) receiver to be connected to a DISH Pro Plus switch or DISH Pro Plus LNBF using one cable, when used with a DISH Pro Plus Separator.
- All three of the following MUST be used for the single-cable, dual-tuner installation, and must be connected together:
  1. A DISH Pro Plus Switch or DISH Pro Plus LNBF
  2. A DISH Pro Plus Separator
  3. A DISH Pro Plus (dual-tuner) receiver

### For More Information

- Review latest list of DISH Pro Plus (dual-tuner) receivers on *Quick Facts: DISH Pro Plus Technology*.

### Frequently Asked Questions

1. *Can I connect two single-tuner receivers (like ViP211, DISH Player-DVR 510, etc.) to a DISH Pro Plus Separator for the single-cable installation?*

**NO!** The two receivers are DISH Pro, not DISH Pro Plus (dual-tuner) receivers.

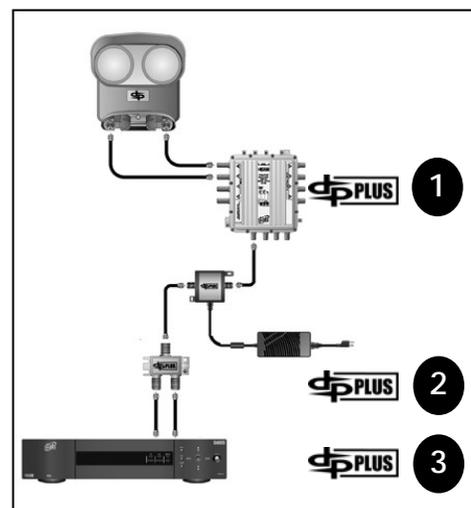

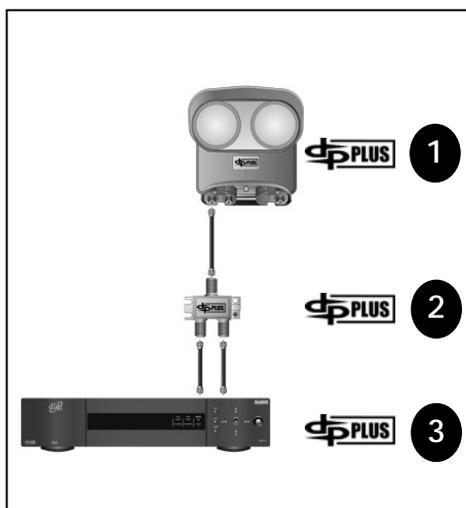

**Remember: It Takes 3 DISH Pro Plus components.**

2. *Can I connect a DP Plus Separator to DISH Pro LNBF or Switch and use that with a DISH Pro Plus receiver for the single-cable installation?*

**NO!** A DP Plus Separator must be connected between a DISH Pro Plus LNBF or Switch and a DISH Pro Plus receiver.

**Remember: It Takes 3 DISH Pro Plus components.**

## Single-Cable, Dual-Tuner Installation Examples

DISH Pro Plus Logo  
Appears on all DISH Pro  
Plus products, except  
DISH 721. DISH 721 does  
not have DP Plus capabilities.
